Strategic Insights & Action

Health & Psychological Risks

1. Declining Self-Esteem Due to Over-Reliance on AI for Tasks and Neglect of Self-Reliance
2. High Dependency Risk Among Business Users Due to AI Over-Reliance and Outsourcing Thinking
3. Decreased Sleep Quality, Reduced Exercise, and Burnout Due to Long AI Usage Hours for Work

Social & Workplace Risks

1. Higher Relationship Risk Among Single Users Driven by Emotional AI Companionship
2. High Risk Among Employees Driven by Excessive AI Use and Reduced Critical Thinking

Academic & Systemic Drawbacks

1. High Student Risk Driven by AI Academic Automation and Emotional Attachment to Chatbots
2. Most Risk Originates from ChatGPT Driven by its Dominant Usage Share
3. Therapy Replacement and Escapism Among Teens and Isolated Users Seeking AI Validation

Strategic Solutions

1. **Time & Usage Limits:** Restrict continuous AI hours to protect sleep, exercise, and mental well-being.
2. **Task Delegation Boundaries:** Delegate only small tasks to AI rather than relying on it for full projects.
3. **Emotional Safeguards:** Restrict AI emotional interactions to avoid stress, anxiety, and lower self-esteem.
